#### CITY OF CALGARY.

PARKS DEPARTMENT.

ANNUAL REPORT
- 1924 -

To:-

His Worship the Mayor, Commissioner, and Council:-

Gentlemen: -

I submit herewith my 12th Annual Report covering the work of the Parks Department for the year ending December 31st 1924.

The season was not so favourable as that of the previous year. The spring was late and cold, retarking growth considerably with the result that many plants had not reached their full development when the first frosts came in the Fall. One of the great disadvantages of a late spring is that, beginning tate, it is difficult, with a small force to do all the work that is needed in the spring and early summer. It is therefore very necessary to complete all pruning, painting, repairing and similar work as far as possible during the winter, that the whole regular force can be concentrated on seasonal work in the spring time. It is extremely difficult to get good temporary laborers for such work.

There was again a fairly good rainfall. We were unfortunate however in having one or two downpours that were in the nature of cloud-bursts, also some very bad wind storms that did considerable damage.

The area of our park system was increased by approximately 109 acres during the year by the dedication of the following areas for parks purposes:-

Crescent Heights. An addition of three acres to Crescent Park.

Mount Pleasant. Six acres immediately east of Centre Street, suitable for an athletic ground.

Capitol Hill. Four acres for playground purposes.

Glengarry. Four acres, also suitable for a community playground.

Rosevale. Four and one-half acres for athletic grounds.

Stabley Park

Thirty-nine acres. This plot is an ideal piece of land for development as an ornamental park and can also be made suitable for all athletic and playground purposes. It is, in fact, a natural park in its present condition, its surface being beautifully contoured and the outskirts well treed, yet having open level areas that can be developed into playfields of various kinds at small cost. There is also a water course that could be developed for aquatic sports of all kinds.

East Calgary, Five acres near Ramsay School suitable for an athletic field.

East Calgary. An athletic field of three acres on the Walker Estate.

Millican Estate. A strip of 15 acres on the Bow River suitable for development as a picnic ground.

- Page -

Bankview.

Three acres in small plots suitable for small childrens' playgrounds.

West Calgary. A much needed addition of 20 acres to the Municipal Golf Links at Shaganappi Park.

Crescent Heights. A playground site of approximately one acre on 17th Ave. and 3rd Street. N.W.

> Also a similar area in the centre of the city on 16th Avenue and 12th Street West.

> > -0-0-0-0-0-0-

#### - CENTRAL PARK. -

The War Memorial provided by the Col. McLeod Chapter of the I.O.D.E. was erected and unvieled with suitable ceremonial on May. This fine bronze statue is a great acquisition to the park. The small Amazon statue that had previously occupied a position immediately in front of the Library entrance was removed and the mound on which it had been placed, and which had always appeared somewhat of an incongruity levelled with the surrounding area, the space being seeded to grass to become a part of the lawn space.

The bandstand roof was repaired and the building partly painted. Owing to complaints that were made it was deemed advisable to remove the partitions from the arbors on the south side of the park.

The sprinkler system was extended 500 feet and 1000 feet of curbing

laid.

Thirty-one shrubs, 270 perennials, and 10,382 bedding plants were

Every alternate tree was removed from the row of poplars immediately of the Library. These trees were planted rather closely together west of the Library. some years ago to get effect as quickly as possible. When they reached full development, however, it was found that they obstructed too much light from the Library windows.

#### MEWATA PARK. -

This park, due to its location in a thickly settled section of the city, was very fully utilized during the past year for athletic purposes, 117 baseball games being played on the north diamond alone. Besides the two baseball diamonds and the Soccer Football field, areas were set aside for Lacrosse and English Rugby, and all these fields were always in requisition for games. The Interscholastic Rugby matches were also played in this park, 36 games being played. The remodelling of the dressing room was completed and the whole of the exterior painted. The remodelling of the

north diamond was resurfaced with six loads of clay.

Eighty-two trees, and 15 shrubs were planted, these planting being principally along 9th Avenue to give a more park-like appearance from that direction, along the river bank, and behind the baseball bleacher fence. It is intended to add to this latter planting annually until these fences are completely hidden from view. There was also some

grouping of shrubbery around the buildings.

The park fence at Mewata is a most unsightly affair, and it is hoped that the time is not far distant when a proper park fence can be erected.

#### - RILEY PARK. -

A dry cobblestone retaining wall was built along the upper side of the path paralelling the shrubbery on the north side and planted with wuitable flowers.

Eighty-four trees, 48 shrubs, 2551 perennials, and 14,392 annual

flowering plants were used.

Further progress was made with the improvements near the west entrance and it is hoped that these will be completed during the coming season.

A brick chimney was built to replace the tin one at the shelter, thus not only vastly improving the appearance of the building but considerably lessening the risk of fire.

The sludge removed from the pool two years ago by the Engineer's Department and dumped on the north bank was levelled and prepared for seeding to grass.

The Comfort station was painted internally and externally and all

other buildings painted externally.

Some renovating of lawn areas was done but there is a considerable amount of this work yet requiring to be done.

Thirty-one loads of cinders and 12 loads of gravel were used on

roads and paths.

Complaints are continually received calling attention to the wet and muddy surface of the driveway encircling this park when frost is I the ground and after heavy rain storms. The only remedy for this condition is to gravel this driveway.

Notices were placed on the main driveway in proximity to the play-

grounds warning drivers to drive slowly past this area.

#### 1 - ST. GEORGE'S ISLAND. -

The gravelling of the main driveway was continued resulting in considerable improvement, and it is hoped that this work may be completed during the coming season. Special attention will have to be given to that portion over which gravel is hauled from the river by private parties and city departments, as the wear here is excessive and it seems impossible to keep this portion of the road in condition by ordinary means Twenty-eight loads of gravel were used in patching the road gravelled last year.

The Comfort station and band stand were painted internally and

externally.

One hundred and sixty-nine trees, 153 shrubs, 632 perennials, 100

vines, and 3972 annual flowering plants were used.

The shrubs planted were principally flowering species and these were planted in groups to add variety to the native material of which the growth on the Island mainly consists.

Nine picnic tables and benches were made during the winter months.

This was equipment that was urgently needed.

The kitchen that was erected for the accomodation of picnic parties. An additional, to accomodate was reroofed, the walls shingled and the whole painted. kitchen is urgently needed, also more tables and benches, to accomodate the ever increasing number of picnic parties that visit the Island Park.

# - SHAGANAPPI PARK, GOLF COURSE. -

Due to weather conditions during the past season there was some falling off of revenue, though this was still in excess of expenditure by \$27.41 as the following statement shows.

Page ..-

#### GOLF COURSE. (CONT'D)

Total receipts were \$4688.20, made up as follows:-

\$1210.00 60.00 348.00 24.00 24.00 4.00 \$1670.00
2902.20
\$4688.20 4660.79 \$ 27.41

The Golfhouse was ppen 206 days. The greatest number of players in one day, 160 on May 24th. Daily average 81. Total number of players using course 16,769.

That the weather was the main factor in the decrease of revenue, the following comparative statement shows:-

	1923.	Receipts.	1924	Receipts.
March. April.	Weather very fine.	73.10: 1490.95:	Snow most of month.	207.50 290.35
May.	म ग्रांग	1109.60:		1120.75
June. July.	Rain. Very rainy month.	619.00: 595.75:	Rain. Very rainy month.	755.25 581.00
Avg. Sept.		702.20:	The state of the s	472.75 548.50
Oct.		562.90: 445.95:	:	459.40
Nov. Dec.	Open weather.	346.50: 47.60:	Heavy snowdrifts.	85.25 167.45
	Total receipts 1923.	5993.55:	Total receipts 1924.	4688,20

Greens and tees were resurfaced twice during the season and tees relaid once. One new tee was constructed. The purchase of additional mats for tees would lessen cost of maintenance considerably.

mats for tees would lessen cost of maintenance considerably.

The earth excavated for the construction of the new septic tank was converted into a hazard between Greens #11 and #18. This has not only made its removal unnecessary but forms a very useful trap between these two greens.

Further progress was made with the removal of rocks from the Fairways. One hundred feet of sewer pipe was added to the discharge line of the septic tank.

Forty-five spruce trees were planted at the tees, 36 shrubs grouped around the buildings, and 26 trees planted on the main driveway. A number of flowering plants were also used and groups of shrubbery planted in suitable locations in the wicinity of the Golfhouse.

`The triplex mower proved a great boon, lessening the cost of mowing of the fairways over the previous year by \$430.55 notwithstanding that they were mowed more frequently and generally kept in better condition. There was some criticism from certain patrons of the Course because this machine was taken from there to be used on other parks when not required at the golf course, the impression being that it was purchased out of golf course revenue and should be used there exclusively.

- Page --

#### GOLF COURS獎. (CONT'D)

The fact was overlooked that it is almost the first piece of machinery that has been charged direct to the golf course, no charge being made against the course for the equipment and tools that

have been used there since its opening in 1915.

The main hall of the Golfhouse was refloored with maple and the walls and ceiling lined with beaver board and painted. A brick chimneyy was built to replace a very dangerous flue and an attractive open fire-The mens lockers were rearranged for more convenient place built. access and better lighting of the locker room, and the porch built in 1923 painted externally. The tool house, shelters, benches and other 1923 painted externally. outside equipment have also been painted.

A year-round water service is very urgently needed for the Golfhouse. The course is in use for a considerable time after it is necessary to shut the water off in the fell, and is again in use long before it is safe to turn it on in the spring. Furthermore it is a tiresome and expensive business keeping the caretaker supplied with water during the winter months by hauling it in barrels, particularly during a winter like the present one, when the roads have at times been practically impassable.

#### - CRESCENT PARK. -

Thirty-seven trees were planted on this park and these trees staked and watered and cultivated throughout the season.

#### SUNDRY PLOTS. -

The usual maintenance work consisting of cutting lawns, care of walks, flower beds, and shrubbery, was carried out on the City Hall, Garden, Victoria Park, Tompkins Gardens, R.N.W.M.Police Memorial Plot. Sunalta Park, Mount Royal and Elbow Park Street Intersections and Garden

#### -- ELBOW BOULEVARD PARK. -

Through the magnanimity of the public spirited citizen who financed the improvements to this area in 1923, it was made possible to add further improvements during the past year in the shape of rustic seats and shelters, laying of curbing to the walks, extending the shrubbery plantations and preparing additional flower beds, the sum provided privately for this work being \$467.40 for construction work, and \$232.60 for maintenance.

#### PLAYGROUNDS . -

Eleven playgrounds were maintained during the year and seven supervised during the holiday season.

New playground apparatus was placed on Elbow Boulevard Park. The attendance during the period of supervision was as follows:-

Playground.	Boys.	Girls.	Total.	Daily Average.
Mewata Park	10 <b>7</b> 8	1774	2852	66
Riley Park	3509	339 <b>7</b>	6906	161
Tuxedo Park	3140	2539	5679 -	132 134
Victoria Park	3660	2093	5753	145
Riverside School.	3 <b>1</b> 65	<b>31</b> 32	6307	
Crescent Heights Sch. South Calgary.	5418	5491	10909	254
	1856	1501	3 <b>357</b>	78

- Page

#### PLAYGROUNDS. (CONT'D)

The average daily attendance was: - Boys 508; Girls 391; Combined 899. The averaged attendance for the seven playgrounds for the season was: - Boys 21,826; Girls 19,927, Combined 41,753, and

increase of boys and a decrease of girls as compared with 1923.

The games participated in were baseball, basket ball, volley ball, tether tennis, quoits, swimming, industrial work, story telling and singing. Tennis and cricket were introduced at South Calgary with

some success

In the Inter-Playground contests, 32 matches were played for Girls' Senior Basket Ball, Mewata Park winning the final. Thir games were played in the Intermediate section and the same number in both sections for boys. There were 354 entries in all classes on the final Field Day which was held at Riley Park on August 27th.

The system of daily reports made by the supervisors is proving

eminently satisfactory.

The Y.M.&.Y.W.C.A., again very kindly provided facilities for swimming lessons, the children participating being limited to those

only who could not swim.

Whilst, as the above figures show, hundreds of children are reached through our seven supervised playgrounds, yet there are still many children growing up whose playground is the street. The street is not only a source of physical danger to the child who is forced to play thereon, but this environment does not ordinarily produce the highest type of citizenship, which unquestionably is the greatest asset that can be attained by any city, regardless of its wealth.

The damage to childrens playground apparatus by vandals is considerable. It is very regrettable that this damage, mostly committed under

cover of darkness, should so often pass without apprehension of

punishment of the offenders.

#### -- RINKS.--

Skating and hockey rinks were maintained at Hillhurst Athletic Ground and Mewata Park, these rinks being lighted and heated dressing rooms kept open throughout the season, a very nominal charge being made for the use of these dressing rooms.

A sheet of ice was also kept in condition on the Elbow River during

the winter of 1922-24.
Community rinks were flooded by the Waterworks Department at eight

locations, the cost being charged to this Department.

The operation of the rinks not only provides a form of recreation for which there is urgent public demand but enables us to ensure continuity of employment to a number of men whose services are of value in park work at other seasons of the year.

#### ATHIETICS. -

Pending the settlement of the dispute with regard to Hillhurst Athletic Ground, this Department discontinued maintenance and supervision of this property, so that we have no record of summer activities in this Park.

The gravel bank on the north side of this park is now being removed by the Public works Department for street gravelling. This will make it possible to further develope these grounds.
Athletic activities ar Mewata Park have already been mentioned under

that heading.

The cricket grounds at Riley Park were repaired and maintained and were in very active use throughout the season. A certain amount of work was also done on the Crescent Heights Athletic Grounds, St. George's Isle

-- Page ---

#### ATHLETICS. (CONTID)

and Mewata Park Tennis Courts, Tuxedo Park Football Ground and South Calgary Cricket Ground. Improvements were made at the swimming pool on the Elbow River and a man placed in charge of the dressing rooms during the season. Bleachers were moved from Hillhurst to Victoria Park on the occasion of the visit of the Corinthian Amateru Football Team from England and assistance given in preparing the grounds. Assistance was also given for the School Sports which were held at St. George's Island and Victoria Park.

The following is a list of recreational features provided by the

> -0-0-0-0-0-0-- BOULEVARDS. -

All boulevards were raked and cleaned as soon as weather permitted in the springtime, 251 loads of refuse being removed.

Four hundred and eighty-five trees and 69 shrubs were planted.

Three hundred and five additional trees were planted on the Memorial \*\*

Drive and all tags again checked, replacements being made where necessary.

With reference to remarks that are sometimes made as to the

difficulty of establishing trees in this city and the great number of
replacements that the Parks Department is supposed to be continually
making, I would call attention to the following facts, which speak for
themselves. Since 1913, 21,623 trees have been planted on the streets
as follows:-

1913 - 3000; 1914 - 2404; 1915 - 1939; 1916 - 3174; 1917 - 3064; 1918 - 1828; 1919 - 1370; 1920 - 1297; 1921 - 612; 1922 - 649; 1923 - 1801; 1924 - 485; Total - 21,623.

These plantings include both new plantings and replacements. At the present time there are 17,422 living trees on the city streets and avenues, which is not a bad record considering the number that are destroyed by accident or wilful damage.

Considerable attention was given to overhanging trees where they encroached on the sidewalks so as to interfere with pedestrians, both the boulevard trees and those on private property receiving attention.

the boulevard trees and those on private property receiving attention.

Grass cutting was commenced on June 3rd, the boulevards being cut
over twice in the central area, the outlying districts being cut once
only, and the work discontinued on August 30th.

There has been quite a demand during the past year for the construction of new boulevards in various parts of the city, some of these being made by this Department, others by private effort. 2320 lin. feet on 13th Street N.W., and 1050 lin. feet on 3rd Ave N.E. were constructed under Local Improvement Bylaw. A petition has recently been received for 3875 sq feet of boulevarding on 16th St and 26th Ave East Calgary.

Considerable grading was made necessary to an unimproved boulevard space on 19th Avenue west owing to the construction of a concrete sidewalk. As the Local Improvement Bylaw did not include any expence of this kind the work had to be paid for out of the Parks Appropriation. I would suggest that, in similar cases in the future, provision be made in the By-Law for such expences when estimates are prepared.

The usual annual inspection of all boulevards was made for the purpose of listing all encroachments in the form of hedges, fences of other enclosures, and all persons making such enclosures have been notified to sign the regular form of lease and pay the required rent. There are at the present time 133 such enclosures, and 102 leases have been signed. The checking up of these enclosures, securing the owners

-- Page --

#### BOULEVARDS. (CONTID).

name and getting the legal description of the property entails a large amount of work.

Numerous complaints were received from time to time at this office regarding the rank growth or weeds and grass and the neglected condition

of the Memorial Driveway and other boulevards in the City.

The work of combatting insect pests was continued during 1924. It was found that borers were more numerous than for several seasons past. Aphides appeared in large numbers in the late summer as usual, but the most alarming circumstance was the appearance of large numbers of the larvae of poplar leaf beetles in the fall. Spraying was immediately resorted to in order to prevent as far as possible the spread of this very serious pest, but I am very much afraid that there may be a very bad outbreak next season unless the winter has been unfavourable to the hibernation of this insect. It is far more important and satisfactory to preserve trees already established than to plant new ones and this department has always endeavoured to give all the attention that finances permitted to those operations that tend to preserve the trees and keep them in a healthy vigorous condition, such as watering and pruning, and preventative and remedial measures with regards to pests and desease. It has not always been possible to do all that was desired along these lines, but the Department has never lost sight of the importance of this work and has done the best possible under existing conditions. One of the most important operations in this connection is the cleaning, dressing and water-proofing of wounds, where canker might otherwise gain an entrance, and we have endeavoured to do this work regularly at least once every year with the result that many a tree that would ere now have succombed to that desease has been restored to a healthy condition.

Trouble has been experienced in the matter of roots of street trees and those on private property entering and choking sewer pipes. Unfortunately the altitude here restricts the choice of trees to a very small number, seven in all, four of which are species of Boplar, this tree being the most roublesome of any in this connection as has been generally recognised by other cities. We are continually experimenting with other species of trees in small quantities in an effort to discover other hardy species, but the only others we have been able to grow so far are Manitoba Maple or Box Elder, a tree that does not attain to any size at this altitude and is not therefore satisfactory as a shade tree; the Green Ash, which is exceedingly slow growing, does not leaf until nearly midsummer, and loses its foliage at the first touch of frost in the Rall, and is furthermore a very open growing tree affording little shade; and the White Birch, which also is a poor shade tree and slow growing.

Enquiries were made as to how this problem has been dealt with in other cities. Of seventeen cities heard from twelve have experienced trouble of this kind, and all are of the opinion that the only remedy is the proper construction of sewers so that they will be root-proof. There are a number of suggestions as to how the sewers can be made impervious to the roots which I have passed on to the City Engineer. It is the unanimous opinion of those replying that the removal of alternate trees

would be quite useless.

It is most unfortunate that we should be so situated in this city that, so soon as a tree reaches the stage where it is an object of beauty and beneficial by the shade it affords, the dust it prevents, and the atmospheric moisture it disseminates, where all these things are so badly needed, difficulties should arise and its growth have to be restricted because the verticle growth of branches fouls the wiring, the lateral growth of same causes trouble to pedestrians, whilst the lateral growth of roots desrupts sidewalk and paving and the vertical growth of same causes trouble with sewers.

-- Page --

#### BOULEVARDS. (CONT'D).

Street trees are a valuable asset to a city, and, due to the damage done to these trees by vehicles and vandalism, and the necessity of assessing damage when prosecutions take place in police court, other municipalities are adopting a fixed scale of valuation. I have therefore decided to adopt a similar practice and have placed the following valuation on our trees.

Trees		diame ter		Trees 4			Trees 8"	diam.	
	2"		7.50	4		<b>3</b> 0.00	911		70.00

The perpetual care fund is now \$15,525.77

The popularity of this system once it becomes known and understood is very clearly indicated by the fact that since the new regulations were put into force in the Burnsland Cemetery 203 lots in the perpetual care sections have been sold as against 174 lots sold without care.

-- Page

#### CEMETERIES. (CONT'D)

The new cemetery By-Law examined by the Legislative Committee and approved by the Council on 18th August 1924 is proving very satisfactory in operation, my one regret in that connection being that the whole of the new cemetery was not included in the perpetual care scheme instead of a portion.

Signs were placed near the two cemetery entrances on the Macleod Trail, warning drivers of vehicles of the danger of driving rapidly at

this point.

Nine hundred and twenty-nine trees, 724 shrubs, 7431 perennial and 14,570 annual flowering plants were used. Some gravelling of roads was done but there is a considerable amount of this work yet to be done. main driveway extending south from the Macleod Trail entrance to the wouth boundary and returning northwards along the crest of the hill is nothing but a dirt road and very flat at that. Consequently it gets nothing but a dirt road and very flat at that. into a very bad condition during wet weather. There is no doubt that a proper crowning of the Cemetery roads with gravel, together with the construction of cobblestone channels, not only makes them negotiable in all weathers, but also saves immensely on maintenance costs. Fourhundred yards of channelling was laid this year and borders of sections graded to same. Seven 12" culverts were built across the road paralleling the Macleod trail to convey the water that gathers from the hillside away from the road. Grading on Section X was continued. Eight loads of soil were conveyed to the slope of the Hebrew Cemetery and 822 shrubs planted.

204 loads of refuse removed. 240 manure & mulch used. 266 soil removed from graves. 167 cinders used on roads. 126 gravel used on roads. 24 lot markers made and placed.
67 loads rocks used for gutters & retaining walls. loam used for surfacing grave plots. subsoil moved in grading operations. 413 259 soil used for refilling sunken graves.

A large number of plots adjoining the roads where grade was below the level of the section were graded with black loam and seeded to grass. At Block lA; Sec R. the grassway was graded level from the sidehill and the surplum earth put into the fill on Section X.

At Block 1: Sec N. the border was widened to bring it in line with Sections S. and P, this was also seeded to grass.

Trees and shrubs were planted on the side hill facing the Nurseries, and on all vacant spaces in all Sections.

Fifty superficial yards of rock retaining wall were constructed

against cut banks.

The road from the East gate was brought up to grade with surplus earth from gravedigging, a coating of gravel 180 years long, 8 years wide and 4 inches deep was laid, and the whole dressed with ashes. Bad washouts caused by heavy storms were also filled in with gravel.

BURNS LAND CEMETERY. One hundred trees, 123 shrubs, 743 perennial and 1200 annual flowering plants were used. The flower border on either side of the road leading direct from the Union Cemetery and which will eventually form the main central driveway were completed and planted, a background of trees and shrubs being provided. These borders did remarkably well and greatly added to the appearance of this new cemetery. The change of public sentiment during the past year with regard to the use of this site for cemetery purposes was quite remarkable and I am disposed to think that it was largely due to the attractive

-- Page

#### BURNSLAND CEMETERY. (CONTD)

appearance of these borders, visitors receiving a good impression

immediately they entered the grounds.

One hundred and sixty-two feet of 2", 767 feet of 1", and 40 feet of 3" water service pipe, and 12 service taps were installed.

All grave plots in the perpetual care sections were loamed as they were sold and seeding was continued as late into the season as was advisable.

Considerable fencing had to be done, the old fence being in a very delapidated condition.

The present situation with regard to road construction is as

45,550 sq feet excavated, loam removed, and gravelled. 18,800 sq ft excavated and loam removed only, 42,850 sq feet unimproved.

> 415 loads of soil were removed from graves, 181 gravel used on roads. 661 lot markers made and placed.

The black loam was removed from roads for grave plots, and surplus earth from gravedigging was used to make a fill in readiness for a surfacing of gravel.

Heavy storms called for regravelling roads at different points as

the roads were cut up very badly by traffic.

Trees and shrubs were planted along the borders of Sections A.C.D.

E.M.&.N, also several groups on Sections E.D.&.F.

Lots were measured off and markers put in as follows:-Sec. F. 3 blocks, Sec E. 2 blocks, Sec D. 1 block, Sec M, 1 block, Sec N. 1 block.

A number of lots were measured off on other sections and lot pegs put in.

With the addition of some thirty acres to be roughly cared for and th e constantly increasing area in both cemeteries to be intensively maintained, the problem of operating the cemeteries without an increased appropriation annually becomes a more difficult one, and this problem is being made much more acute by the rapid increase of the number of plots under perpetual care. Even though expenditures exceed revenue by an increasing amount each year, (and that is a foregone conclusion, seeing that the old cemetery will shortly cease to be revenue producing) I feel that the city cannot afford to be niggardly in its appropriation for cemetery purposes, for the care of the last resting place of the dead always demands respectful consideration.

In view of the fact that the grave of Colonel Macleod is a spot of considerable historical interest and was in a very neglected condition this plot was thoroughly renovated and improved last season at the Citysa \*

expence.

The year 1925 being the 50th anniversary of the coming of the Royal North West Mounted Police to Calgary, it seems to me that the present is a very fitting time to carry this idea further, either by private or public enterprise, and arrange for the improvement and the marking by some suitable monument of the whole of the R.N.W.M.Police Plot which is in a very neglected condition at the present time. The scheme might be extended to the graves of any of those early settlers who figured The scheme might be of course be made, at the same time, for the perpetual care of these improvements, that these areas may not again become as they have been in the past, deserted villages of the dead.

We have in stock at the present time, 19,860 trees, 47,129 shrubs, and 14,381 miscellaneous plants valued at \$21,061.20

The following propagation by cuttings and root division was done: - 9,800 trees, 4,285 shrubs, 1512 herbaceous plants and 263 vines.

#### -- GENERAL. --

E.P.RANCH. I am pleased to be able to state that the plan of suggested improvements to the grounds of the E.P.Ranch House prepared by me in 1923 was satisfactory to H.R.H. the Prince of Wales, and considerable progress was made with the work during the past season.

An experienced man was supplied for two weeks for the planting and ten trips were made by myself to the Panch for the purpose of watching the trips were made by myself to the Ranch for the purpose of watching the progress of the work. Material for planting was supplied from the Civic Nursery. As there has been criticism in some quarters with regard to this work being done by me, I take this opportunity to state that I have received no remuneration whatever for this work beyond the Civic Nursery. regular salary paid me by the City and I have travelled to and from the Ranch entirely at my own expense.

DOMINION DAY CELEBRATIONS. A temporary platform and flagpole was erected at Mewata Park and spaces marked off for the individual schools for the purpose of the school childrens' exercises on the morning of Dominion Day. A monster parage was held

and some 10,000 adults and children were in attendance.

Race tracks and other facilities were provided for the picnic and sports at St. George's Island held during the afternoon and which was

also attended by a wast throug of citizens.

In the evening space was roped off for dancing and a temporary bandstand elected on the Riverside Boulevard, and thousands again availed themselves of the facilities for amusement thus provided.

-- Page.. 13 --

#### GENERAL. (CONT'D).

Work was done in connection with the erection and unveiling of the War Memorial in Central Park, the Dominion Day Celebrations and the Memorial Ceremonies in September.

The bandstand at Tuxedo Park has been wrecked and the lumber stored

for future use.

The roof of the office building was repaired and the damage that had been caused to the interior by the leaky condition of this roof rectified.

The Ford truck belonging to this Department has been in the City's service for twelve years, and maintenance and repair costs have mounted enormously. I beg to recommend that this truck be replaced with a new one. As this Department could use two trucks during the summer season with considerable advantage and a saving of horse hire, be thereby effected, I would suggest that another truck be purchased for the joint use of this Department and another Department that has need of same during the winter months.

Notwiths tanding that the annual appropriation for park purposes was less than in 1923, by economy in administration and careful management of labour it was possible to maintain the improved parks in a reasonably well kept condition, though little could be done towards the development of the unimproved portions.

In closing my report I wish to say that we have tried to make the service of this Department to the people as satisfactory as our finances would permit.

Respectfully submitted.

SUPERINTENDENT OF PARKS.
