#### **January 2019 Headline Inflation**

Comparison is based on 12-month-moving-average of the CPI

### **Major Contributors to Calgary's Inflation Rate**

**Calgary Census Metropolitan Area Share of Goods and Services** 

Calgary: In January 2019, the Consumer Price Index (CPI) increased 2.34 per cent and 0.08 per cent compared to January 2018 and December 2018 respectively.

sus Metropolitan A

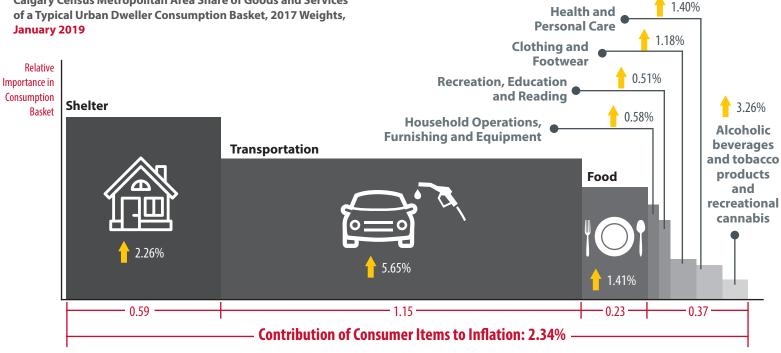

The major contributor to the January 2019 annual inflation rate was the cost of transportation. It added 1.15 percentage points to the annual inflation rate. The contribution of transportation costs to annual inflation at the same time last year was 0.64 percentage points. Excluding the impact of transportation costs, the annual average CPI rose 1.19 per cent in January 2019.

The second largest contributor to inflation was food and shelter adding 0.82 percentage points to the January 2019 annual inflation rate. Like transportation, the contribution of food and shelter costs to annual inflation is much higher than it was in January 2018. In recent months, increases to the cost of transportation, food and shelter have played a more significant role in the annual inflation rate.

Alberta: It was in October 2018, that the final component of planned increases to the Alberta minimum wage took effect. The minimum wage became \$15/hour. Apart from Alberta, the provinces of Ontario, Québec and Prince Edward Island introduced minimum wage increases in 2018. The impact of the minimum wage increase should flow through to inflation as producers and providers of goods and services look to benefit from the higher purchasing power of local consumers.

Canada: The United States tariffs on Steel and Aluminum (25 and 10 per cent respectively) remain in place. Canada's retaliatory tariffs are also still in place. Both sets of tariffs put upward pressure on inflation as the higher costs of goods with steel and aluminum components get passed on to consumers.

For January 2019, the Alberta and Canada-wide annual inflation rates were 2.44 and 2.25 per cent respectively. The January 2019 annual inflation rates for Calgary and Alberta are slightly higher than Canada.
