

ENMAX Corporation	
1. How can you prevent trips?	Pay attention while walking and look at your surroundings. Look for rolled rugs, cords, toys or items on the ground. If you see something, fix it!
2. How can you prevent slips?	If you spill something, clean it up. You or someone else could slip. When walking outside in the winter, be aware of the conditions. If you can't avoid walking on ice, walk very carefully and shuffle like a penguin.
3. How can you prevent falls?	Think before you climb on things at home. Use a proper sturdy stool to reach things above your reach or ask for an adult to help. Balcony and deck railings are to prevent you from falling. They are not for leaning over or standing on.

AEDARSA	
1. What are the 2 things you need to check on yourself before stepping onto an escalator?	Make sure your shoe laces are tied and secure any loose clothing.
2. In case of emergency, where would you find the emergency stop button on an escalator to stop the escalator?	Emergency buttons are located on the handrail on the top and bottom of the escalator.
3. Are strollers, carts or wheelchairs appropriate to take on an escalator? Why?	No, escalators are designed for people only. Strollers, carts and wheelchairs are not safe to ride on escalators. They should use an elevator.

Alberta Health Services	
1. Stress is always bad for us and should be avoided at all costs.	False Stress can be healthy feedback for us to problem solve and change or strengthen our responses. E.g. we stress a muscle to make it stronger
2. What we say to ourselves makes a difference in our stress response.	TRUE! We can ask ourselves...Are my thoughts beating me up or building me up? Ask, what is a thought that is more helpful and true?
3. Taking good deep breaths can help us calm down.	TRUE! Deep breathing triggers our parasympathetic nervous system to help us calm down. There are many different techniques to try like Box breathing and Starfish breathing. Practicing these when we are not feeling so stressed helps us to use these strategies at times when we would like to lower our stress response.

Alberta Motor Association - AMA School Safety Patrol	
1. Who is responsible for getting you across the street safely?	Don't assume a driver has seen you- you are the only person who can ensure you are safe.
2. How can you stay safe when crossing the street?	Make eye contact with drivers, and pay attention to what is going on around you.
3. What are the 3 P's of pedestrian Safety?	Point your arm, Pause to double-check for traffic, Proceed when it is safe to do so.

ATCO	
1. What is natural gas & what does it smell like? What do you do when you smell natural gas?	Natural gas is a fossil fuel used as a source of energy for heating, cooking, and electricity generation. There's a chemical that is put into natural gas called mercaptan so you can smell it if it's released. It smells like rotten eggs or sulphur. If you smell natural gas in your home, leave immediately and go to a neighbours house to call 9-1-1 or ATCO.
2. What is carbon monoxide?	CO is invisible, silent, and odourless, making it extremely hard to detect. In an enclosed space, even a small amount of exposure to CO can lead to serious illness or death.
3. What can I do to help keep my family safe in the home around natural gas & carbon monoxide?	Install CO detectors in your home. Visual inspection of the natural gas furnace: Inspect the venting for cracks and blocks to ensure proper air flow. Regularly check the flame of the natural gas furnace and all natural gas appliances (the flame should burn blue).
