## SCHEDULE 4

### Partnership Sectors

The City's Investment in Partnerships will be tracked and reported according to Sector to enable The City to understand how much it invests in each Sector as an aggregate.

The Relationship Contact, along with the Office of Partnerships, will determine a Partner's sector using the table below. Sectors are based on *The International Classification of Non-Profit Organizations* (ICNPO). This classification system is widely used by other countries, which allows for international comparison and is also specifically devised to reflect the range and nature of activities undertaken across the community and within each Sector. Although Partnerships are classified according to their primary area of activity, it is understood that some organizations operate in multiple areas.

The City does not have Partnerships operating in all of the ICNPO Sectors, therefore, only the Sectors that The City's Partnerships operate in have been included below:

<b>CULTURE AND RECREATION</b>	Media and communications (including libraries); Visual arts, architecture, ceramic art; Performing arts; Museums; Zoos and aquariums; Sports; Recreation and social clubs; Service clubs; and Membership organizations.

## SCHEDULE 5

### Full-cycle Partnership Principles

The Full-Cycle Partnership model was developed by The Partnering Initiative, an independent non-profit organization. The purpose of the model is to provide a set of principles by which the life of a Partnership may be understood, recognizing that Partnerships are evolutionary and no one Partnership conforms precisely to the exact sequence. Administration will use these principles to understand, support, and work with Partners throughout the duration of a Partnership. Activities associated with each stage, by Category, will be included in the *Investing in Partnerships Framework*.

Phase	Stage	Goal
